

Engineering Technician

FRC is seeking an Engineering Technician for its Palm Bay, Florida operations. This person will work side by side with the manufacturing and design engineering personnel supporting Engineering department efforts to analyze and simplify production processes; reduce manufacturing cycle times and increase quality levels.

PRIMARY RESPONSIBILITIES

- Ability to setup, program, maintain and troubleshoot manufacturing equipment.
- Understand, learn, and improve existing production processes supporting multiple departments.
- Participate in the creation, update, and control of assembly work instructions for line operators.
- Participate in the design of jigs, test fixtures, special tools, or test aids for use in the manufacturing process.
- Implement tasks within the company Quality Management System procedures and process specification.
- Work on special projects assigned by management.

REQUIREMENTS

- Two-Year Degree in Manufacturing and/or Engineering Related study program. Some experience is preferred.
- Knowledge of PLC computers, CNC machines, Robotics and Electronic Assemblies and standards.
- Knowledge of CAD/CAM and ability to create 2D/3D drawings using AutoCAD or similar tools.
- Good technical problem-solving skills as well as good written and verbal communication and organizational skills.
- Proficient in using MS Office suite applications.

Apply for this position at hr@frccorp.com if you seek a challenging long term career opportunity with a stable and growing company. We are an equal opportunity employer.
